

ANTagonist[®] PRO

YOU'LL LOVE THE EXPANDED LABEL CLAIMS. PESTS WON'T.

WEAPONS UPGRADE

Over a period of 4 years extensive research into key situations and significantly important pest application was conducted. The result is a vastly improved product label - the most extensive of any product of this class in Australia.

With **ANTagonistPRO** pest management professionals now have the most comprehensive market segments and pest situations covered in one pack.

COMBINING FUNCTIONALITY WITH GREATER FLEXIBILITY

Pest management professionals demand products that can be applied to key pests in a flexible situations - one product that can do multiple tasks provides better efficiency.

Sundew Solutions undertook extensive field trials to vastly expand the pest profile for **ANTagonistPRO**, while developing other target application possibilities. The **ANTagonistPRO** label now boasts exciting new claims for:

- General Pests
- Specific Termite uses
- Turf Pests
- Roses, Carnations and other Ornamental Plant Pests

General urban pest.

ANTagonistPRO is approved for ants, spiders, wasps, cockroaches, mosquitoes, biting midges, fleas, flies and ticks.

Specific termite uses.

POWERED BY:
**POLYMER
ENHANCED
BIFENTHRIN**

Controlling pests in a genuinely different way.

ANTagonistPRO was designed with its polymer technology to afford the most robust treatment in a variety of outdoor harsh situations.

Standard outdoor chemical treatments are quickly broken down by:

- Ultraviolet rays from the sun
- Rain
- Heat from the sun
- pH of the surface the chemical is applied to

ANTagonistPRO represents research and development into cutting-edge formulation technology incorporating the only polymer enhanced bifenthrin available to pest management professionals in Australia.

Powered by Polymer Enhanced Formulation Technology.

ANTagonistPRO (launched in Australia in 2013 as the first specialty purpose made outdoor ant treatment) incorporates the innovative Polymer Enhanced Technology to overcome harsh environmental factors that breakdown ordinary pyrethroid treatments.

ANTagonist PRO Product Specifications

Active constituent: 80 g/L bifenthrin

Formulation type: Suspension Concentrate

Use rate: Apply as per directions for use.

Chemical group: pyrethroid

Schedule: S5

Pack sizes: 1 L, 5 L

GROUP 3A INSECTICIDE

Better Performance. Better Value.

ANTagonistPRO was scientifically developed specifically to meet the performance characteristics modern pest management professionals demand.

ANTagonistPRO now boasts the broadest pest label claims of any bifenthrin product in Australia now making this the number one choice no matter what the situation - indoors and out.

NEW ANTagonistPRO - the Key to Effective Pest Management
